- Always start posing from the feet
- Stand client in profile or 3/4 view
- Pull shoulders back slightly, ensure that she does not look “stiff”
- Ensure a gap between back and arm
- Push hip to one side with slight arch in the back
- Apparent width of hips and bottom is reduced
  
- Remember to allow your client to rest often and to stretch when needed, she is not going to be able to hold poses for prolonged periods
- Place foot closest to the camera on tip toe to lift the knee and round her bottom

POSTURE  
TIP TOE
